## 4 Scanning Transmission Electron Microscopy of Nanoparticles

*Jingyue Liu*

4.1	Introduction to STEM and associated techniques	81
4.2	STEM instrumentation	85
4.3	Imaging with high-energy electrons	88
4.4	Coherent electron nanodiffraction	104
4.5	Imaging with secondary electrons	112
4.6	Imaging with Auger electrons	119
4.7	Nanoanalysis with energy-loss electrons and X-rays	124
4.8	Summary	128
	References	129

## 5 Scanning Probe Microscopy of Nanoclusters

*Lifeng Chi and Christian Röthig*

5.1	Introduction	133
5.2	Fundamental of the techniques	134
5.3	Experimental approaches and data interpretation	136
5.4	Applications for characterizing nanophasic materials	141
5.5	Limitations and Prospects	159
	References	160

## 6 Electrical and Electrochemical Analysis of Nanophase Materials

*Zhong Shi and Meilin Liu*

6.1	Introduction	165
6.2	Preparation of nanostructured electrode	166
6.3	Principles of electrochemical techniques	172
6.4	Application to nanostructured electrodes	191
6.5	Summary	193
	References	194

## 7 Optical Spectroscopy of Nanophase Materials

*C. Burda, T. Green, C. Landes, S. Link, R. Little, J. Petroski, M. A. El-Sayed*

7.1	Introduction	197
7.2	Experimental	199
7.3	Metal nanostructures	200
7.4	Semiconductor nanostructures	218
	References	238

## 8 Nuclear Magnetic Resonance – Characterization of Self-Assembled Nanostructural Materials

*Li-Qiong Wang, Gregory J. Exarhos, and Jun Liu*

### Abstract

8.1	Introduction	243
8.2	Basic principles of solid state NMR	243
8.3	Application of NMR in characterization of self-assembled materials	245
8.4	Materials design, characterization, and properties	248
8.5	Conclusion	255
	References	258
		259

## 9 Photoluminescence from Single Semiconductor Nanostructures

*Stephen Empedocles, Robert Neuhauser, Kentaro Shimizu and Moungi Bawendi*

### Abstract

9.1	Introduction	261
9.2	Sample Preparation	261
9.3	Single Nanocrystal Imaging	263
9.4	Polarization Spectroscopy	263
9.5	Single Nanocrystal Spectroscopy	265
9.6	Spectral Diffusion	269
9.7	Large Spectral Diffusion Shifts	271
9.8	Stark Spectroscopy	275
9.9	Conclusion	277
	References	285
		286

## 10 Nanomagnetism

*Wal A. de Heer*

10.1	Introduction	289
10.2	Basic concepts in magnetism	290
10.3	Magnetism in reduced dimensional systems	297
10.4	Microscopic characterization of nanoscopic magnetic particles	300
10.5	Magnetic properties of selected nanomagnetic systems	307
	References	313

## 11 Metal-oxide and -sulfide Nanocrystals and Nanostructures

*A. Chemseddine*

11.1 Introduction	315
11.2 Nanocrystals processing by wet chemical methods – general remarks on synthesis and characterization	316
11.3 Sulfides nanocrystals	318
11.4 Connecting and assembling sulfide nanocrystals	330
11.5 Oxide nanocrystals: synthesis and characterization	339
11.6 Applications, prospects and concluding remarks	349
References	350

## 12 Electron Microscopy of Fullerenes and Related Materials

*G. Van Tendeloo and S. Amelinckx*

12.1 Introduction	353
12.2 Molecular crystals of fullerenes	354
12.3 Crystals of C <sub>60</sub> derived materials	363
12.4 Graphite nanotubes	365
12.5 Conclusions	390
References	392
Index	395

## Electrical and Electrochemical Analysis of Nanophase Materials

*Zhong Shu and Meine Lin*

6.1 Introduction	101
6.2 Preparation of nanostructured electrode	105
6.3 Principles of electrochemical techniques	172
6.4 Application to nanostructured electrodes	191
6.5 Summary	205
6.6 References	207
6.7 Index	207
6.8 Optical Spectroscopy of Nanophase Materials	211

*C. Birdy, T. Green, E. Lendlein, A. Lutz, J. Pacholski, M. Saliba, and J. Schmid*

7.1 Introduction	197
7.2 Experimental	199
7.3 Metal nanostructures	201
7.4 Semiconducting nanostructures	218
7.5 References	239
